

Hymatil™

Tilmicosin injection -
300 mg/mL

DIN 02431912

Hymatil™ is indicated for the treatment of bovine respiratory disease (BRD) associated with *Mannheimia (Pasteurella) haemolytica* and *Pasteurella multocida* and for the reduction of morbidity associated with bovine respiratory disease (BRD) in feedlot calves, caused by *Mannheimia (Pasteurella) haemolytica* and *Pasteurella multocida*, during the first 30 days in the feedlot, when administered at the time of arrival. Hymatil™ is indicated for the treatment of pneumonic pasteurellosis in lambs associated with *Mannheimia (Pasteurella) haemolytica*.

Dosage and Administration:

Inject subcutaneously in cattle. Inject subcutaneously in lambs greater than 15 kg body weight only. Administer a single subcutaneous injection of 10 mg tilmicosin/kg body weight (1 mL per 30 kg/1.5 mL per 100 lbs.). Do not inject more than 25 mL per injection site.

See package insert for full information on side effects, precautions, warnings and contraindications.

Packaging: 100 and 250 mL multidose vials

Storage: Store at 30°C or below. Protect from direct sunlight. Discard unused product after 28 days of first broaching the vial.
